Loretta C. Ford, EdD, R.N., PNP, FAAN, FAANP

From the seed of an idea planted by Dr. Loretta Ford and the late Dr. Henry Silver 43 years ago at the University of Colorado, the Nurse Practitioner program has grown into a global movement. The nurse practitioner role was developed when a shortage of primary care physicians provided an OPPORTUNITY to demonstrate advanced practice in Public Health Nursing.

Join us in hearing about our past, the present and what can be our future from the visionary who began our journey in making a difference in healthcare today!
